Journal of Computational Chemistry

ORGANIC / INORGANIC / PHYSICAL / BIOLOGICAL

Index to Volume 14
Issues 1–12
Jan 1993–Dec 1993

A WILEY-INTERSCIENCE PUBLICATION
John Wiley & Sons, Inc.
NEW YORK / CHICHESTER / BRISBANE / TORONTO / SINGAPORE

ISSN 0192-8651 JCCHDD 14(11) 1259–1416(1993)

Journal of
Computational Chemistry

Editors:

Norman L. Allinger, Department of Chemistry, Computational Center for Molecular Structure and Design, University of Georgia, Athens, GA 30602-2556

Paul von R. Schleyer, Institut für Organische Chemie, Universität Erlangen-Nürnberg, Henkestrasse 42, D-91054, Erlangen, Germany

Assistant Editors:

Martin Feigel, Institut für Organische Chemie, Universität Erlangen-Nürnberg, Henkestrasse 42, D-91054, Erlangen, Germany

Roger S. Grev, Department of Chemistry, University of Kentucky, Lexington, KY 40506

Editorial Board:

Alexandru T. Balaban, Department of Organic Chemistry, Polytechnic, Bucharest, Roumania
Enrico Clementi, Department of Chemistry, University L. Pasteur, 3, rue de l'Université, 67084 Strasbourg, France
Warren J. Hehre, Wavefunction, 18401 Von Karman, Suite 370, Irvine, CA 92715
William L. Jorgensen, Department of Chemistry, Yale University, 225 Prospect Street, New Haven, CT 06511
Martin Karplus, Department of Chemistry, 12 Oxford Street, Harvard University, Cambridge, MA 02138
Joyce J. Kaufman, Department of Chemistry, Johns Hopkins University, Baltimore, MD 21218
Peter A. Kollman, Department of Pharmaceutical Chemistry, School of Pharmacy, University of California, San Francisco, CA 94143
Paul G. Mezey, Department of Chemistry, University of Saskatchewan, Saskatoon, Canada S7N OWO
Keiji Morokuma, Department of Chemistry, Emory University, Atlanta, GA 30322
Eiji Osawa, Department of Knowledge-Based Information Engineering, Toyohashi University of Technology, Tempaku-cho, Toyohashi, 441, JAPAN
John A. Pople, Department of Chemistry, Northwestern University, 2145 Sheridan Road, Wilmette, IL 60208
Peter Pulay, Department of Chemistry, University of Arkansas, Fayetteville, AR 72701
Alberte Pullman, Institut de Biologie Physico-Chimique, 13, rue Pierre et Marie Curie, 75005 Paris, France
Leo Radom, Research School of Chemistry, The Australian National University, Canberra, A.C.T. 0200, Australia
Harold A. Scheraga, Baker Laboratory of Chemistry, Cornell University, Ithaca, NY 14853-1301
Andrew Streitwieser, Jr., Department of Chemistry, University of California, Berkeley, Berkeley, CA 94720
Kenneth B. Wiberg, Department of Chemistry, Yale University, 225 Prospect Street, New Haven, CT 06520

Editorial Production, John Wiley: Lillian Solondz

The *Journal of Computational Chemistry* (ISSN: 0192–8651) is published monthly, one volume per year, by John Wiley & Sons, Inc., 605 Third Avenue, New York 10158.

Copyright © 1993 John Wiley & Sons, Inc. All rights reserved. No part of this publication may be reproduced in any form or by any means, except as permitted under section 107 or 108 of the 1976 United States Copyright Act, without either the prior written permission of the publisher, or authorization through the Copyright Clearance Center, 27 Congress Street, Salem, MA 01970, (508) 744-3350, fax (508) 745-9379. Second-class postage paid at New York, NY, and at additional mailing offices.

The code and the copyright notice in the journal indicate the copyright holder's consent that copies may be made for personal or internal use, or for the personal or internal use of specific clients, on the condition that the copier pay for copying beyond that permitted by Sections 107 or 108 of the United States Copyright Law. The per-copy fee for each item is to be paid through the Copyright Clearance Center, Inc.

This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Such permission requests and other permission inquiries should be addressed to the Permission Dept.

Subscription price (Volume 14, 1993): $596.00 in US, $716.00 in Canada and Mexico, $761.00 outside North America. All subscriptions outside US will be sent by air. Payment must be made in US dollars drawn on a US bank. Claims for undelivered copies will be accepted only after the following issue has been received. Please enclose a copy of the mailing label. Missing copies will be supplied when losses have been sustained in transit and where reserve stock permits. Please allow four weeks for processing a change of address. For subscription inquiries, please call (212) 850-6645.

Postmaster: Send address changes to *Journal of Computational Chemistry,* Susan Malawski, Director, Subscription Fulfillment and Distribution, John Wiley & Sons, Inc., 605 Third Avenue, New York, NY 10158. For subscription inquiries, please call customer service at (212) 850-6645 or write to the above address.

Advertising: Inquiries concerning advertising should be forwarded to Roberta Frederick, Advertising Sales, John Wiley & Sons, Inc., 605 Third Avenue, New York, NY 10158, (212) 850-8832. Advertising Sales, European Contact: Michael Levermore, Advertising Manager, John Wiley & Sons, Ltd., Baffins Lane, Chichester, Sussex PO 19 1UD, England.

Manuscripts should be submitted to one of the Editors, Dr. Norman L. Allinger, *Journal of Computational Chemistry,* Department of Chemistry, The University of Georgia, Athens, GA 30602; or Prof. Dr. Paul von R. Schleyer, *Journal of Computational Chemistry,* Institut für Organische Chemie, Universität Erlangen-Nürnberg, Henkestr. 42, D-8520, Erlangen, Germany. *Information for contributors* appears in the first and last issue of each volume. *All other correspondence* should be addressed to *Journal of Computational Chemistry,* Publisher, Interscience Division, Professional, Reference, and Trade Group, John Wiley & Sons, Inc., 605 Third Avenue, New York, NY 10158.

The contents of this journal are indexed in the following: *Chemical Abstracts, Mathematical Reviews, Chemical Titles, Research Alert (ISI), Science Citation Index (ISI), SCISEARCH Database (ISI),* and *Current Contents/Physical, Chemical, and Earth Sciences.*

Printed on acid-free paper.

Journal of
Computational Chemistry

Subject Index to Volume 14

Ab initio calculation, of multiple-hydrogen exchange reaction, 1149
Ab initio calculations, basis set superposition error correction, 401
Ab initio calculations, electron correlation in, 907
Ab initio calculations, electron repulsion integral compression algorithm in, 8
Ab initio calculations, general program for (GAMESS), 1347
Ab initio calculations, multicentered integrals in, 1203
Ab initio calculations, of bond stretching, 881
Ab initio calculations, of copper-water interaction, 629
Ab initio calculations, of electric dipole moments, 1440
Ab initio calculations, of electrostatic potentials, 410, 922
Ab initio calculations, of free energies of hydration, 1498
Ab initio calculations, of ionic systems, 680
Ab initio calculations, of molecular shape, 1172
Ab initio calculations, of NMR shielding, 1364
Ab initio calculations, of one-center integrals, 452
Ab initio calculations, of pyruvic acid decarboxylation, 699
Ab initio calculations, of quadrupole coupling constant of liquid water, 1553
Ab initio calculations, of relative basicities of carboxylate lone pairs, 685
Ab initio calculations, of transition metal ligand complexes, 961
Ab initio calculations, on adenine binding, 45
Ab initio calculations, on CdS clusters, 667
Ab initio calculations, on dithiin and dioxin, 1376
Ab initio calculations, on dopamine, 353
Ab initio calculations, one electron integrals in, 986
Ab initio calculations, on H_4^{2+}, 285
Ab initio calculations, on hexafluorides of selenium and tellurium, 1234
Ab initio calculations, on hydrogen/silicon surface, 1534
Ab initio calculations, on magnesium compounds, 1523
Ab initio calculations, on oxazole and thiazole, 75
Ab initio calculations, on peroxides, 379
Ab initio calculations, on polymers by extrapolation, 1468
Ab initio calculations, on siloxanes and silicates, 216
Ab initio calculations, on thallium halides, 913
Ab initio calculations, on the phosphaethyne energy surface, 186
Ab initio calculations, on the rotational barrier in phosphatriafulvene, 3
Ab initio calculations, on Van der Waals molecules, 1136
Ab initio calculations, parallel processing of, 445, 818, 1429
Ab initio calculations, parallel program for, 1142
Ab initio calculations, supplementary *d* and *f* functions in, 54, 67
Ab initio calculations, using recurrence relations for integral evalutions, 30
Acidities of organic oxyacids, calculation of, 1460
Alcohols, oxidation of, 392
Alkyl peroxides, molecular mechanics calculations on, 755
Anomeric effect, on O—C—N, 944
Atomic charges, from electrostatic potentials, 858, 1036
Atomic charges, from the partial equalization of orbital electronegativity method, 1482
Atomic charges, via different procedures, comparison of, 1504

Basis set superposition error, correction of, 401
Basis sets, see wave functions, 54
Benzene dimer, 647
Benzene, flexibility of, 121
Benzenes, solvation of, Monte Carlo calculations, 195, 206
β-lactam antibiotics, semiempirical calculations on, 1545
Bradykinin, conformational analysis of, 438

Cadmium sulfide, *ab initio* calculations on clusters of, 667
Carboxylate ion, relative lone pair basicity, 685
Cellobiose, molecular dynamics and conformational analysis of, 831
Cellobiose, molecular dynamics of, 848
Chiral force constants, 751
Cocaine, conformational analysis of, 934
Conformational analysis, of Bradykinin, 438
Conformational analysis, of cocaine, 934
Conformational analysis, Ramachandran maps and similarity indices, 478
Conformational analysis, using distance geometry, 114
Conformational search, 790
Conformational search, for alkene and lactone conformers, 330
Conformational searching, 1385, 1407
Conformational searching, by torsional flexing, 691
Conformational searching, methods for, 1050
Coordinates, natural internal, optimization in, 1085
Copper-water interaction, *ab initio* calculations of, 629
18-Crown-6 complexes, conformations of, 899
Crystal structures, prediction of, 422
Cutoff problem, path integral theory, 728
Cytochrome P450-mediated reactions, semiempirical calculations of, 1250

Density functional theory calculations, on halogenated methane reduction, 1575
Diatomic molecules, matrix elements for, 1519
Diatomic potential, analytic function for, 1320

Dipole moments, electric, *ab initio* calculation of, 1440
Distance geometry, for conformational analysis, 114
1,2-Dithiin and 1,2-dioxin, *ab initio* calculations on, 1376
Dopamine, molecular mechanics calculations on, 353

Eigenvalue problem, using a Lanczos scheme, 769
Electron correlation, local, 736
Electron correlation, MP2 gradient evaluation, 907
Electrostatic calculations, improved solution to the Poisson-Boltzmann equation, 1417
Electrostatic calculations, in proteins, 161
Electrostatic potentials, *ab initio*, 410
Electrostatic potentials, atomic charges from, 1036
Electrostatic potentials, calculation by semiempirical methods, 1101
Electrostatic potentials, finite element approach for macromolecules, 484
Electrostatic potentials, fitting of, 858
Electrostatic potentials, from semiempirical calculations, 799
Electrostatic potentials, of solvent, 253
Electrostatic potentials, similarity analysis of, 928
Electrostatics, in molecular dynamics, 867
Energy minimization, using nuclear Overhauser data, 226

Flexibility, molecular, 718
Force constants, chirality of, 751
Force field, for glucose, 263
Force fields, comparison by molecular dynamics, 1281
Free energies of hydration, for small molecules, 1498
Fullerene-helium complexes, semi-empirical calculations on, 37

Geometry optimization, comparison of Cartesian and natural internal coordinates, 1085
Geometry optimization in Cartesian coordinates, constrained, 1339
Globular proteins, lattice representations of, 1194
Glucose, harmonic force field for, 263
Green function calculations, vectorization of, 13
Guanosine triphosphate, molecular mechanics calculations on, 995

H_4^{2+}, *ab initio* calculations on, 285
Halogenated methanes, reduction of density functional calculations on, 1575
HIV protease inhibitors, molecular mechanics calculations on, 1446
Hydration, free energies, of organic molecules, 1240
Hydration, of benzenes, Monte Carlo calculations of, 195
Hydration, of proteins, 1007, 1396
Hydration, of small molecules, free energy of, 1498
Hydrogen bonding, phenol-water, 1027
Hydrogen bonding, semiempirical calculations, 639
Hydrogen bonding, semiempirical calculations on, 89
Hydrophobic interactions, calculation of, 741

Integers, packing/unpacking of, 673
Integrals, electronic, compression algorithm for, 8
Integrals, evalution of using recurrence relations, 30
Integrals, multicenter evaluation of, 1203
Integrals, one-center, efficient computation of, 452
Integrals, one-electron for arbitrary operators over Cartesian Gaussians, 986
Ionization potentials, of organic molecules, empirical calculations in, 138

Lanczos method, for eigenvalue problem, 769
Ligand size, method for calculating, 1042
Lipids, molecular mechanics calculations on, 1066
Lipophilicity, prediction of, for nucleosides, 1019
Lithium, in semiempirical calculations, 1301
Long-range interactions, truncations for, 278, 285, 295

Madelung potential, point charge representation of, 680
Magnesium compounds, *ab initio* calculations on, 1523
Molecular dynamics, annealing in, 438
Molecular dynamics, calculation of hydrophobic interactions, 741
Molecular dynamics calculations, on 18-crown-6 complexes, 899
Molecular dynamics, electrostatics in, 867
Molecular dynamics, energy conservation in, 1112
Molecular dynamics, of benezene, 121
Molecular dynamics, of biomolecules, 1212
Molecular dynamics of cellobiose, 831, 848
Molecular dynamics, of folding, 718
Molecular dynamics, of glucose crystals, 1281
Molecular dynamics, parallel processing of, 312
Molecular dynamics, partitioning into characteristic modes, 1259
Molecular dynamics, using Monte Carlo methods, 19
Molecular mechanics calculation on alkyl peroxide, 755
Molecular mechanics calculations, conformational searching with, 330
Molecular mechanics calculations, for lipids, 1066
Molecular mechanics calculations, modular, 455
Molecular mechanics, calculations on, 995
Molecular mechanics calculations, on dopamine, 353
Molecular mechanics calculations, on HIV protease inhibitors, 1446
Molecular mechanics calculations, on peroxides, 379
Molecular mechanics, calculations, on pseudo peptides, 471
Molecular mechanics calculations, on sulfones, 655
Molecular mechanics calculations, parallel processing in, 977
Molecular mechanics, multipole models in, 970
Molecular mechanics, of O—C—N anomeric effect, 944
Molecular shape, from charge density, 1172
Molecular surfaces, calculation of, 246, 349
Molecular surfaces, solvent accessibility of, 1290
Monte Carlo calculations, of benzenes hydration, 195

Monte Carlo calculations, of benzenes, solvation, 206
Monte Carlo calculations, parallel processing of, 127
Monte Carlo methods, for protein dynamics, 19
Morse potential, for diatomics, 1320
Multiple-minima problem, new approach to, 1333

NMR shielding, *ab initio* calculation of, 1364
NMR spectra, of polypeptides, 1164
Nucleosides, prediction of lipophilicity of, 1019

Oxazole, quantum mechanical calculations on, 75
Oxidation, of alcohols by liver alcohol dehydrogenase, 392
Oxidation, potential surface for, 1313

Packing/unpacking of integers, 673
Parallel processing, for *ab initio* calculations, 818
Parallel processing, of *ab initio* calculations, 1142, 1429
Parallel processing, of Hartree-Fock calculations, 445
Parallel processing, of molecular dynamics, 312
Parallel processing, of molecular mechanics calculations, 977
Parallel processing, of Monte Carlo calculations, 127
Path integral theory, cutoff problem, 728
Peptides, multipole models of, 970
Peptides, pseudo, calculations on, 471
Peptides, side chain conformations, generation of, 715
Peroxides, *ab initio* and molecular mechanics calculations on, 379
Perturbation method, vectorization of, 13
Phenol-water system calculations, of, 1027
Phosphaethyne, *ab initio* calculations on, 186
Phosphatriafulvene, rotational barrier in, 3
Platinum binding, to amino acids, *ab initio* calculations on, 45
Poisson-Boltzmann equation, multigrid solution of, 105
Poisson-Boltzmann equation, solution of, 1417
Polymers, *ab initio* calculations on, by extrapolation, 1468
Polypeptides NMR spectra, interpretation of, 1164
Potentials, from semiempirical and *ab initio* wave functions, 922
Proteins, calculations of electrostatic energies in, 161
Proteins, electrostatics in, 484
Proteins, hydration of, 1007, 1396
Proteins, multiple-minimum problem in, 1333
Proteins, prediction of binding of small molecules to, 1184
Proteins, side chain conformation optimization, 790
Protein surfaces, solvent accessibility of, 1290
Proximity effects, in Barton reaction, 1313
Pyruvic acid, decarboxylation of, 699

QSAR, of 5-HT_{1A} receptor ligands, 237

Radical cation complexes, semiempirical calculations on, 1561
Ramachandran maps, and similarity indices, 478
Reaction mechanisms, calculation of the plausibility of, 1454
Regression analysis, using orthogonalized power series, 363

Selenium hexaflorides, *ab initio* calculations on, 1234
Semiempirical calculations, beyond MNDO, 775
Semiempirical calculations, core-repulsion functions in, 895
Semiempirical calculations, electrostatic potentials from, 799
Semiempirical calculations, in lithium parameters, 1301
Semiempirical calculations, of electrostatic potentials, 922, 1101
Semiempirical calculations, of hydrogen bonding, 639
Semiempirical calculations, of oxidation by liver alcohol dehydrogenase, 392
Semiempirical calculations, of reactions, 1250
Semiempirical calculations, of solvent effects, 253, 371
Semiempirical calculations, of water clusters, 1326
Semiempirical calculations, on β-lactam antibiotics, 1545
Semiempirical calculations, on elementary reactions, 1491
Semiempirical calculations, on fullerene-helium complexes, 37
Semiempirical calculations, on hydrogen bonding, 89
Semiempirical calculations, on hydrogen/silicon surface, 1423
Semiempirical calculations on oxazole and thiazole, 75
Semiempirical calculations, on polyglycolic acids, 809
Semiempirical calculations, on radical cation complexes, 1561
Semiempirical calculations, on ring systems, 895
Silicon surface/hydrogen, *ab initio* calculations on, 1534
Silicon surface/hydrogen, semiempirical calculations on, 1423
Siloxanes, *ab initio* calculations on, 216
Singularities, efficient handling of, 1272
Solvent effects, by semiempirical calculation, 371
Solvent effects, electrostatic, 253
Steric size, method for calculating, 1042
Sulfones, Molecular mechanics calculations on, 655

Thallium halides, *ab initio* calculations on, 913
Thiazole, quantum mechanical calculations on, 75
Topological indexes, 155
Transition metal complexes, *ab initio* calculation of, 961
Triquinacene, homoaromaticity in, 251

Van de Waals molecules, 647
Van der Waals molecules, *ab initio* calculations on, 1136
Van der Waals parameters, for rare gases, 1077
Vector computing methods, in perturbation, 13

Water clusters, semiempirical calculations on, 1326
Water, liquid, quadrupole coupling constant, calculation of, 1553
Wave functions, *d* and *f* supplementary functions in, 54, 67

X-ray powder diagrams, similarity of, 1125
